

Wall Drawer

Installation Guide

We suggest using a professional installer to hang the Wall Drawers.

Each Wall Drawer has two hangers and each hanger is designed to carry 100kg/220 lbs.

1. Decide on the desired mounting height of the Wall Drawer and use the brackets to mark the 8 screw points on the wall (4 for each bracket)*.

* If mounting on a stud wall, ensure screw points make contact with a stud or blocking.

2. Secure the steel plates to the wall using appropriate anchors and the included screws.

3. Mount the Wall Drawer on the wall by anchoring the posterior hooks on the steel support plates.

4. Remove the drawer from the wooden box.

5. Use the 4 screws to adjust the level and depth of the Wall Drawer.

6. Turn the upper screws to adjust the horizontal level.

7. Turn the lower screws to adjust the distance from the wall.
